CSE216- Web Programming 2

TOROS UNIVERSITY

COMPUTER AND SOFTWARE ENGINEERING DEPATRMENT

Laboratory Work #3

This laboratory work covers basic PHP

1. Create a database "mydatabase1" using PhpMyAdmin and then create three tables for this database as table1, table2 and table3.

Table1:

ID	Name	LastName

Table2:

ID	Name	Grade	LetterGrade

Table3:

Name	LastName	Age	Salary

Insert some information for each table according to their types using PhpMyAdmin.

2. Write a complete PHP code using form elements (Textbox, button, …) to select all information from table 1, then select the records with LetterGrade equal to A from table 2. For table 3, try to select Name and LastName of records with salary greater than 1000TL and age less than 30. Print the number of rows and columns for each database too.
